# A reputation built in Warehousing & Logistics

## PC Howard offers total warehouse solutions

**PC Howard offers modern, purpose built warehousing facilities with the ability to receive goods either in palletiised form or we can de-van cartons from containers.**

We then provide further value with additional services such as re-packing, re-labelling or re working to meet your needs. We will then receive your order and pick and dispatch your goods, whether this is by carton and parcel carrier or full pallets going out on our own vehicles or via the Palletways Network.

### Fully Integrated Options

We offer added value services which are all geared specifically to provide a total third party warehousing solution for your business, taking away the cost and headache of storage and stock management. Our warehousing services are seamlessly integrated into all aspects of the logistics process including freight distribution via our modern transport fleet and the pallet network due to our membership with Palletways.

**Our services are BRC and ISO 9001 registered**

### Container De-stuffing

In most cases, when your supplier loads your container for onward shipment they will simply stack the cartons containing your products into the container. On arrival at our site we then have the facility to remove the cartons and palletise them for storage in our warehouse or for onward distribution.

**Effective Solutions**

At PC Howard Limited, accepting goods in this way poses no problems to us at all - we have dedicated loading docks, and an experienced workforce who will utilise our facilities to ensure that your goods are safely stored away and then made available for quick dispatch.

**We store goods under United Kingdom Warehousing Association conditions of storage**

To enquire about our warehousing services, call our **Booking Line** on **(01780) 444444**

## Pick & Pack

With continual investment in our well trained and dedicated workforce based at warehousing depots in Peterborough and Corby, we have all the necessary infrastructure in place to manage your product in bulk – in effect, the perfect fulfilment solution.

We can...

- take your product in large quantities
- split your stock into individual consignments
- re-package and send it to its destination.

And as PC Howard Ltd is a member of the Palletways Network, we can also tap into this service too, whether in the UK or Europe.

### Handling Product in Bulk

Alternatively, we can receive your goods already palletised into one of our warehouses.

Using either our vehicles or the Palletways network, we can then offer a cost effective distribution service.

## Product Reworking

We can receive and store your products in one of our warehouses, split and repackage the goods, remove and replace the labelling with bar code labels, palletise and shrink wrap your products and then redistribute it throughout the UK & Europe via our dedicated vehicle fleet or Palletways network.

## Industry Leading Systems

Our warehousing services are fully supported by industry leading management systems. Features include:

### Inventory Management
We operate the latest in stock management systems using FIFO Principles (First in, First Out)

### Electronic Communication
You can interface with our business software and transfer your consignment data electronically

### KPI Management
We work to performance KPI's for the management of our warehousing depots. We can report our performance directly to our customers and these reports can be tailored to your requirements.

## Security

Our sites deploy modern CCTV security systems and our warehouses are also alarmed using the Redcare facility which means that they are linked to an independent monitoring station. We have the systems and infrastructure in place to ensure that your goods are stored securely.
